Education

Charusat University - 8.64 CGPA — Gujarat, India
Bachelor of Technology in Information Technology — *October 2021 – May 2025*

The Ambika High School, Gadat - 87.23 % — Gujarat, India
HSC — *June 2019 – July 2021*

Technical Skills

Languages: TypeScript, JavaScript, Java, Kotlin
Lib/Frameworks: Next.js, React, Tailwind CSS, Shadcn UI, Tanstack Router and Query, Node.js, NestJS, Express, Spring Boot, TypeORM, BullMQ, Redis, Jest
Tools: Git, Docker, Keycloak
Databases: PostgreSQL, MySQL, MongoDB

Experience

Web App Developer — December 2025 – Present
WeeTech Solution Private Limited — *Surat, Gujarat, India*

- Hardened and scaled backend systems, achieving 85% test coverage and reducing production runtime errors, by delivering NestJS/Express APIs and designing scalable PostgreSQL schemas and TypeORM migrations.
- Improved deployment reliability and maintainability, reducing environment-related issues, by containerizing services with Docker and implementing clean TypeScript and Git-based workflows.

Web Developer (Internship) — August 2025 – November 2025
Wappzo Infotech Private Limited — *Navsari, Gujarat, India*

- Refreshed and strengthened MERN stack fundamentals by learning HTML, CSS, and Tailwind CSS in the first 20 days, and built 2+ responsive websites (one using HTML & CSS and another using HTML & Tailwind CSS) to ensure cross-device compatibility.
- Enhanced front-end development expertise by deepening skills in TypeScript and React, exploring Next.js for modern web applications, and currently focusing on learning React Native for cross-platform mobile development.

Software Developer (Internship) — December 2024 – May 2025
Liquify Solutions — *Ahmedabad, Gujarat, India*

- Developed and maintained 2 web applications as a part of a 4-member team using React and Spring Boot, reduced page load times by 30% by using Tanstack Router, Tanstack Query, and data fetching techniques.
- Improved code quality and maintainability by participating in bi-weekly code reviews, sprint planning, and implementing best practices across two web apps.

Projects

RitualPlanner | *Next.js, Shadcn UI, NestJS, TypeScript, PostgreSQL, BullMQ, Redis, Docker* — May 2026 – Present

- Streamlined ritual and task management for Karmakand professionals by centralizing calendar-based scheduling, client records, expense tracking, notes, reminders, and daily activities into a unified full-stack platform.
- Digitized traditional priest workflows by replacing fragmented diary- and phone-based coordination with structured digital management, improving organization and efficiency across daily rituals and client operations.

Furniture Rentals | *ReactJs, ExpressJs, MongoDB, Tailwind CSS* — Jun 2024 – July 2024

- Created a full-stack furniture renting web application in a 36-hour national hackathon with features such as JWT-based authentication, rental tracking system, and payment integration via Razorpay to focus on scalable rental solutions and secure transactions.
- Collaborated with a 3-member team to deliver a working demo with seamless user flow and error handling, receiving positive feedback from judges for completeness and clarity.

Leadership & Achievements

- 2024 - **Placed in top 150** out of 2,300 teams in **Odoo Combat National Hackathon 2024** for developing a full-stack furniture rental platform with **secure authentication, rental tracking, and payment integration.**
- 2024 - Selected as an **AWS Cloud Captain 2024** from **1,600+ applicants, with only 83 chosen nationwide** for demonstrating skills in cloud computing and **community leadership.**
